- Light from the front, covering the whole stage, including 8 meter up in the air.
- Light from stage front top down, to have the Teeterboard visual for Lukas and Aaron.
- No lights from the side or from the roof over the teeterboard, this will blind Lukas and Aaron.
- Lights on the walls behind both Lukas and Aaron from the floor and 6 m up, (this is to have a reference point, so that Lukas and Aaron knows where they are in the air).
- Run through with light technician (30 min) must happen before the show to set the right levels of the light and check that Lukas and Aaron does not get blinded in any position.
- In case of a big venue, or far between stage and the technicians space a communication system is needed between the two.
